I am writing to express my strong interest in the Operations Manager, Futures position. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I am eager to bring my expertise in trade settlement, reconciliation, and lifecycle management back to the financial services industry.

At Morgan Stanley in Glasgow, I managed daily trade settlement and reconciliation across multiple asset classes, processed corporate actions, and resolved breaks with counterparties and internal teams. This hands-on experience gave me a thorough understanding of clearing workflows, margin processes, and the operational rigour required in a fast-paced trading environment—skills directly transferable to futures operations. I developed advanced proficiency in Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon, enabling me to streamline processes and improve accuracy across high-volume trade flows.

I am currently working as an Advertising Account Manager, which has sharpened my stakeholder management, project coordination, and problem-solving abilities. However, my passion remains firmly in financial operations, and I am motivated to return to a role where I can apply my technical knowledge and operational expertise to support a derivatives trading desk. I am confident that my combination of hands-on post-trade experience, quantitative academic background, and client-facing skills positions me well to contribute meaningfully to your futures operations team.

I would welcome the opportunity to discuss how my experience aligns with your needs. I do require Skilled Worker visa sponsorship and am happy to provide further details.

I look forward to hearing from you.
