I am writing to express my strong interest in the Financial Analyst position within Private Wealth Management. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction) from the University of Westminster, I bring a solid foundation in financial analysis, trade lifecycle management, and client-facing operations that aligns well with this role.

At Morgan Stanley, I developed deep expertise in trade settlement, portfolio reconciliation, and corporate actions processing across multiple asset classes. Working within Prime Brokerage exposed me to high-net-worth and institutional client portfolios, sharpening my ability to analyse complex financial data, identify discrepancies, and deliver accurate reporting under tight deadlines. My advanced proficiency in Excel/VBA, Bloomberg, and Refinitiv Eikon enables me to extract meaningful insights and support data-driven investment decisions—skills directly transferable to wealth management analysis.

I am currently in an Advertising Account Manager role, which has strengthened my client relationship management and communication abilities. However, my passion remains firmly in finance, and I am eager to return to the industry where my technical expertise and analytical mindset can deliver the most value. The opportunity to support wealth management clients with rigorous financial analysis is exactly the career path I am pursuing.

I hold a Skilled Worker visa and would require sponsorship. I would welcome the opportunity to discuss how my Morgan Stanley experience and quantitative skill set can contribute to your team's success.

I look forward to hearing from you.
