I am writing to express my strong interest in the Product Control Manager position. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in trade lifecycle management, reconciliation, and financial controls that aligns directly with the demands of this role.

At Morgan Stanley in Glasgow, I was responsible for trade settlement, daily reconciliation of positions and cash flows, post-trade operations, and corporate actions processing across multiple asset classes. This experience gave me a thorough understanding of P&L drivers, valuation processes, and the critical importance of accurate financial reporting-core competencies for any product control function. I developed advanced Excel/VBA models to streamline reconciliation workflows and worked extensively with Bloomberg, CTM, and Refinitiv Eikon to ensure data integrity across front-to-back systems.

I am currently working as an Advertising Account Manager, a role that has sharpened my stakeholder management, analytical problem-solving, and ability to communicate complex information clearly to diverse audiences. However, my passion remains firmly in financial services, and I am eager to return to a role where I can leverage my technical expertise and operational knowledge to strengthen control frameworks and support trading desks effectively.

I should note that I would require Skilled Worker visa sponsorship for this role. I would welcome the opportunity to discuss how my experience in prime brokerage operations and financial reconciliation can add immediate value to your product control team.

I look forward to the opportunity to connect.
