I am writing to express my strong interest in the Regulatory Reporting Accountant position (12-month FTC) at M&G plc. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in financial operations, reconciliation, and regulatory precision that aligns well with this role.

At Morgan Stanley in Glasgow, I was responsible for trade settlement, daily reconciliation of complex financial instruments, post-trade operations, and corporate actions processing. This work demanded meticulous attention to detail, strict adherence to regulatory timelines, and the ability to identify and resolve discrepancies across large datasets—skills directly transferable to regulatory reporting. I developed advanced proficiency in Excel/VBA, Bloomberg, and Refinitiv Eikon, and gained a thorough understanding of the trade lifecycle and the controls framework underpinning accurate financial reporting.

My academic background in Investment & Risk Finance strengthened my understanding of financial regulation, risk measurement, and accounting principles relevant to institutional asset management. I am eager to return to financial services after a brief period in a different sector, and this role represents an ideal opportunity to apply my technical expertise and operational rigour within M&G's regulatory reporting function.

I should note that I would require Skilled Worker visa sponsorship. I would welcome the opportunity to discuss how my experience and qualifications can contribute to your team's reporting accuracy and compliance objectives.

I look forward to hearing from you.
