I am writing to express my strong interest in the Regulatory Reporting Manager position. With 2.5 years of experience in Prime Brokerage operations at Morgan Stanley and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in the data accuracy, regulatory frameworks, and analytical rigour that effective regulatory reporting demands.

At Morgan Stanley Glasgow, I worked extensively across trade settlement, daily reconciliation, and corporate actions processing-functions that required meticulous attention to detail, strict adherence to reporting deadlines, and a deep understanding of the post-trade lifecycle. I developed advanced proficiency in Excel/VBA to automate reconciliation workflows and routinely engaged with platforms including Bloomberg, CTM, and Refinitiv Eikon. This experience gave me first-hand exposure to the controls environment and data governance standards essential to regulatory compliance.

I am currently working as an Advertising Account Manager, which has sharpened my stakeholder management, project coordination, and communication skills-capabilities that translate directly to managing regulatory submissions and liaising with internal teams and external bodies. I am now eager to return to financial services, where my technical expertise and operational background can deliver the most impact.

I would welcome the opportunity to discuss how my experience aligns with your team's needs. Please note that I would require Skilled Worker visa sponsorship. I am confident that my blend of hands-on operations experience, quantitative education, and proactive work ethic would make me a strong contributor to your regulatory reporting function.

I look forward to the opportunity to speak further.
