I am writing to express my strong interest in the Regulatory Reporting and Data Management Assistant role within your Finance team. With 2.5 years of experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in financial data management, reconciliation, and reporting processes directly relevant to this position.

At Morgan Stanley in Glasgow, I was responsible for trade settlement, daily reconciliation, and post-trade operations across multiple asset classes. This work required meticulous attention to data accuracy, adherence to strict regulatory timelines, and close collaboration with compliance and front-office teams. I developed advanced proficiency in Excel/VBA to automate reconciliation workflows, and regularly used Bloomberg, CTM, and Refinitiv Eikon to validate and manage large datasets-skills that translate directly to regulatory reporting and data integrity requirements.

I am currently working as an Advertising Account Manager, which has strengthened my stakeholder management and communication skills. However, my passion remains firmly in finance, and this role represents the ideal opportunity to return to the industry where my technical expertise and experience are best applied. I am particularly drawn to the combination of regulatory reporting and data management, as it aligns with my strengths in accuracy-driven, process-oriented work within a compliance-focused environment.

I would welcome the opportunity to discuss how my experience can contribute to your team. I do require Skilled Worker visa sponsorship and am happy to provide further details on this. I look forward to hearing from you.
