I am writing to express my strong interest in the Senior Treasury Manager position. With 2.5 years of experience in Prime Brokerage at Morgan Stanley and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in financial operations, liquidity management, and risk awareness that aligns well with the demands of a senior treasury function.

At Morgan Stanley in Glasgow, I managed trade settlement and reconciliation across multiple asset classes, processed corporate actions, and ensured accuracy across the full trade lifecycle. This role required meticulous cash and position management, close collaboration with counterparties, and real-time problem-solving under tight deadlines—skills directly transferable to treasury operations including cash forecasting, funding management, and financial risk oversight. My advanced proficiency in Excel/VBA, Bloomberg, and Refinitiv Eikon enables me to analyse large datasets, automate reporting, and support strategic decision-making efficiently.

Having briefly pivoted into advertising account management, I developed strong stakeholder communication and project coordination skills. However, my passion remains firmly in finance, and I am eager to bring my technical expertise and operational rigour back to a role where I can drive treasury strategy, optimise liquidity, and contribute to robust financial governance.

I currently hold a Skilled Worker visa and would require sponsorship. I would welcome the opportunity to discuss how my experience and drive can add value to your treasury team, and I am available for interview at your convenience.

I look forward to hearing from you.
