I am writing to express my strong interest in the Trade Operations - Crypto role. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation in trade settlement, reconciliation, and operational risk management that translates directly to the demands of crypto trade operations.

At Morgan Stanley in Glasgow, I managed end-to-end trade lifecycle processes across multiple asset classes, including daily trade settlement, break resolution, and corporate actions processing. I developed advanced Excel/VBA solutions to streamline reconciliation workflows and worked extensively with platforms including Bloomberg, CTM, and Refinitiv Eikon. This experience gave me a thorough understanding of the precision, urgency, and regulatory awareness required in fast-paced trading environments - skills that are equally critical in digital asset operations.

I am genuinely excited about the opportunity to apply my traditional finance expertise to the crypto space. The operational principles - accurate settlement, robust reconciliation, and meticulous record-keeping - remain the same, but the technology and pace of innovation in digital assets present exactly the kind of challenge I am eager to take on. After a brief period in a different industry, I am highly motivated to return to financial operations, and this role represents the ideal intersection of my proven skill set and my ambition to grow within an emerging asset class.

I would welcome the opportunity to discuss how my experience aligns with your team's needs. I do require Skilled Worker visa sponsorship and am happy to provide further details.

I look forward to hearing from you.
