I am writing to express my strong interest in the Trade Support Analyst position. With 2.5 years of post-trade operations experience at Morgan Stanley's Prime Brokerage division and an MSc in Investment & Risk Finance (Distinction), I am confident I can make an immediate and meaningful contribution to your team.

At Morgan Stanley in Glasgow, I developed deep expertise across the trade lifecycle-managing trade settlement, daily reconciliations, break resolution, and corporate actions processing. I worked closely with traders, counterparties, and middle-office teams to ensure seamless post-trade execution, consistently meeting tight deadlines in a high-volume environment. This hands-on experience gave me a thorough understanding of the operational challenges that trade support teams navigate daily and the critical importance of accuracy and clear communication in resolving discrepancies.

My technical toolkit-including advanced Excel/VBA, Bloomberg, CTM, and Refinitiv Eikon-enables me to analyse data efficiently, automate repetitive processes, and identify root causes of trade failures quickly. My postgraduate studies further strengthened my understanding of financial instruments, risk frameworks, and market structures, providing analytical depth that complements my operational background. I am currently working as an Advertising Account Manager, which has sharpened my client management and stakeholder communication skills, but I am eager to return to the finance industry where my core expertise and passion lie.

I would welcome the opportunity to discuss how my experience aligns with your team's needs. I should note that I would require Skilled Worker visa sponsorship. I am available for an interview at your convenience and look forward to hearing from you.
