I am writing to express my strong interest in the Trade Support Engineer position in London. With 2.5 years of hands-on experience in Prime Brokerage operations at Morgan Stanley, combined with a distinction-level MSc in Investment & Risk Finance, I bring a solid foundation in trade lifecycle management and the technical acumen this role demands.

At Morgan Stanley Glasgow, I worked at the intersection of technology and trading operations-managing trade settlement and reconciliation, resolving breaks across multiple asset classes, and supporting front-office teams through post-trade processes including corporate actions. I developed a deep understanding of how trades flow through systems end-to-end, and I became the go-to person for diagnosing and escalating issues efficiently. My advanced Excel/VBA skills allowed me to automate reconciliation workflows, while daily use of Bloomberg, CTM, and Refinitiv Eikon gave me fluency in the tools that underpin trade support functions.

I am currently working as an Advertising Account Manager, a role that has sharpened my client communication, problem-solving under pressure, and stakeholder management skills. However, my passion remains firmly in financial markets, and I am eager to return to a technically oriented operations role where I can combine my market knowledge with my analytical capabilities.

I would welcome the opportunity to discuss how my experience aligns with your team's needs. I do require Skilled Worker visa sponsorship and am happy to provide further details. I look forward to hearing from you.
