I am writing to express my strong interest in the Trading Desk Operations Engineer role. With 2.5 years of hands-on experience in Prime Brokerage operations at Morgan Stanley, combined with a distinction-level MSc in Investment & Risk Finance, I bring a solid foundation in the systems, workflows, and technical challenges that underpin trading desk infrastructure.

At Morgan Stanley in Glasgow, I worked at the intersection of technology and operations-managing trade settlement and reconciliation across complex product sets, resolving breaks in real time, and supporting the post-trade lifecycle from execution through to corporate actions processing. I developed advanced Excel/VBA solutions to streamline daily workflows and worked extensively with platforms including Bloomberg, CTM, and Refinitiv Eikon. This experience gave me a deep understanding of how operational efficiency on the desk depends on robust, well-engineered processes and systems.

My current role as an Advertising Account Manager has sharpened my stakeholder management, problem-solving under pressure, and ability to coordinate across multiple teams-skills directly transferable to a fast-paced trading desk environment. However, my passion remains firmly in financial markets infrastructure, and I am eager to return to a role where I can apply my technical and operational expertise to support front-office trading activity.

I would welcome the opportunity to discuss how my background aligns with your team's needs. I do require Skilled Worker visa sponsorship and am happy to provide further details. Thank you for your consideration-I look forward to hearing from you.
