I am writing to express my strong interest in the Treasury Manager position. With 2.5 years of experience in Prime Brokerage at Morgan Stanley Glasgow and a Master's degree in Investment & Risk Finance (Distinction) from the University of Westminster, I bring a solid foundation in financial operations, liquidity awareness, and risk management that aligns well with the demands of a treasury function.

At Morgan Stanley, I managed trade settlement, daily reconciliations, and corporate actions processing across multiple asset classes, developing a keen understanding of cash flows, counterparty exposure, and the post-trade lifecycle. Working within a prime brokerage environment gave me direct exposure to funding mechanics, margin movements, and the operational controls that underpin effective treasury management. My advanced proficiency in Excel/VBA, Bloomberg, and Refinitiv Eikon enables me to analyse positions, model cash forecasts, and identify discrepancies with speed and accuracy.

I am currently working as an Advertising Account Manager, a role that has sharpened my stakeholder management, strategic planning, and communication skills. However, my passion remains firmly in finance, and I am eager to return to a role where I can apply my technical expertise and operational rigour. The Treasury Manager position represents an ideal opportunity to leverage my quantitative background and hands-on market operations experience in a more strategic capacity.

I do require Skilled Worker visa sponsorship and would welcome the opportunity to discuss how my background can add value to your treasury team. I look forward to hearing from you.
