I am writing to express my strong interest in the Varied Hedge Fund role covering Operations, Compliance, Finance and IT. With 2.5 years of prime brokerage experience at Morgan Stanley and a Master's degree in Investment & Risk Finance (Distinction), I bring a solid foundation across the operational and financial disciplines this position demands.

At Morgan Stanley's Glasgow office, I managed end-to-end trade settlement, daily reconciliations, corporate actions processing and post-trade operations across multiple asset classes. This experience gave me a thorough understanding of the trade lifecycle, risk controls and the regulatory frameworks underpinning them - directly relevant to both the operations and compliance aspects of this role. Working within a global investment bank also required close collaboration with finance, technology and compliance teams, giving me genuine cross-functional exposure that aligns well with the varied nature of this position.

I am proficient in Excel/VBA, Bloomberg, CTM and Refinitiv Eikon, and comfortable working with data systems and operational technology - skills I am confident will translate to the IT-facing responsibilities here. Having worked in a fast-paced, detail-driven environment, I thrive in roles that demand precision, adaptability and ownership across multiple workstreams, exactly the qualities a lean hedge fund operation requires.

I am eager to return to financial services and contribute meaningfully to a dynamic fund. I would welcome the opportunity to discuss how my experience aligns with your needs. I should note that I would require Skilled Worker visa sponsorship.

I look forward to hearing from you.
