

Dear Hiring Manager,

I am applying for the TSS Operations Associate position at Two Sigma. My experience in trade operations at Morgan Stanley — managing settlement, reconciliation, and post-trade controls across global markets — aligns with the operational excellence that Two Sigma requires to support its trading strategies.

I am proficient in Excel and Bloomberg, and have developed automation tools in Python that improved operational efficiency and reduced manual processing time. My background includes monitoring trading activity, resolving settlement exceptions, and collaborating with multiple internal teams to ensure accurate and timely trade processing.

Two Sigma's quantitative and technology-driven approach to trading is compelling, and I am excited about the opportunity to contribute operationally in an environment that values analytical rigour and continuous improvement. While I do not currently hold a FINRA Series 7 or 99 license, I am prepared to obtain these credentials if required.

Kind regards, Nidhi Shetty
