

Dear Hiring Manager,

I am applying for the Corporate Treasury Trade Processing Analyst position in London. With over two years of experience in Operations and Middle Office trade lifecycle management — including settlement, reconciliation, and post-trade controls — I am confident I can contribute effectively to your Funding and Execution Trading Desk.

In my role at Morgan Stanley's Prime Brokerage, I managed the complete trade lifecycle for fixed income and equity products across global markets, processing \$10M+ in daily volume. I operated in a high-pressure, deadline-driven environment where accuracy and speed were non-negotiable — resolving settlement failures involving tri-party repos and cross-border custody transfers, often reducing resolution time from three days to same-day. I am comfortable working within trader-led workflows with rapidly shifting priorities, and I understand the importance of clear, fast communication with trading desks and partner teams.

Goldman Sachs' Corporate Treasury division — managing money market deposits, structured repos, collateral upgrades, and swaps — represents the natural next step for my career. I am eager to bring my settlement expertise, problem-solving ability, and operational discipline to your team.

Kind regards, Nidhi Shetty
