

Dear Hiring Manager,

I am writing to apply for the Trading Services Associate role at JP Morgan. My experience in trading support and operations at Morgan Stanley, where I managed front-to-back processes including confirmations, settlements, and exception management for derivatives products, is directly applicable to this position.

I have operational expertise in swaps, equity derivatives, and cross-border settlement, and understand the full trade lifecycle from execution through to final settlement. I am proficient in Excel (including VBA) and have built automated tools for exception flagging and reconciliation. My ability to work under pressure, manage multiple concurrent priorities, and communicate clearly with trading desks and control functions has been tested daily in a global prime brokerage environment.

I am excited about the opportunity to bring this experience to JP Morgan's Trading Services team and contribute to the operational excellence that supports your trading desks.

Kind regards, Nidhi Shetty
