

Dear Hiring Manager,

I am applying for the Commodities Trade Support Specialist role at Millennium. While my primary experience has been in equity and fixed income operations at Morgan Stanley, my trade support skills — lifecycle management, settlement, reconciliation, and risk escalation — are directly transferable to commodities.

At Morgan Stanley, I managed trade lifecycle processes across global markets, built Python and Excel tools to automate exception monitoring, and collaborated with trading desks and compliance teams to resolve complex settlement issues. I understand the operational rigour that a multi-strategy hedge fund like Millennium demands, and I am confident in my ability to adapt quickly to commodity-specific workflows and products.

I would welcome the opportunity to apply my trade support expertise in a new asset class and contribute to Millennium's operational infrastructure.

Kind regards, Nidhi Shetty
