

Dear Hiring Manager,

I am applying for the Operations role at Capstone Investment Advisors. With experience in fund operations, trade reconciliation, and multi-asset settlement at Morgan Stanley, I bring the operational foundation your team requires.

My background includes daily reconciliation of positions and cash across multiple asset classes, resolving trade breaks, and building Excel-based tools (including VBA) to automate routine operational tasks. I have a strong understanding of fund accounting workflows and the precision required to support trading operations at an institutional level.

I am drawn to Capstone's focus on systematic strategies and would welcome the opportunity to contribute to your London operations team, supporting fund reconciliation and trade lifecycle processes.

Kind regards, Nidhi Shetty
