

Dear Hiring Manager,

I am applying for the Capital Markets Middle Office Specialist (AVP) position at Wells Fargo. With direct experience in middle office operations across rates, fixed income, and equity products at Morgan Stanley, I am confident in my ability to contribute to your Capital Markets team.

My background includes managing pre-matching and settlement across DTC, Euroclear, and Clearstream systems, resolving complex cross-border custody transfers, and collaborating with traders and compliance stakeholders on margin call discrepancies. I have advanced Excel and VBA proficiency, having built reconciliation and automation tools that improved operational efficiency.

While my primary systems experience has been with SafeGUI and TM, I have strong aptitude for learning new platforms quickly and am familiar with the workflows that systems like TOMS, OPICS, and Markitwire support. I would welcome the opportunity to bring my settlement operations expertise and analytical skills to Wells Fargo's London office.

Kind regards, Nidhi Shetty
