

Dear Hiring Manager,

I am applying for the Securities & Derivatives Analyst role at Citi. My experience in reconciliations and markets operations at Morgan Stanley — a Tier 1 bank — aligns with the essential requirements for this position.

At Morgan Stanley, I managed trade reconciliation processes across fixed income and equity products, identified and resolved breaks in settlement workflows, and ensured compliance with regulatory requirements including CSDR. I worked across North American, European, and Asia-Pacific markets, developing a strong understanding of exchange-traded and OTC derivatives processing.

My analytical capabilities, attention to detail, and experience in a Tier 1 institution's operations function make me well-suited to contribute to Citi's Markets Operations team. I look forward to bringing my reconciliation expertise and operational rigour to your London office.

Kind regards, Nidhi Shetty
