Profile

Operations and finance professional with hands-on experience in prime brokerage settlement, fixed income and equity trade lifecycle, and risk management at Morgan Stanley. Combines quantitative analysis skills with Python-driven automation and Bloomberg terminal proficiency to improve operational efficiency across global markets. Looking to leverage this experience in an investment banking or institutional finance environment where trade operations expertise and analytical capabilities drive measurable impact.

Key Achievements

- Improved Straight-Through Processing (STP) rates by 10% at Morgan Stanley by building Python/Excel reconciliation tools that auto-flagged mismatches before settlement deadlines.
- Managed pre-matching and settlement of fixed income and equity trades across US, EMEA, and APAC markets, processing \$10M+ in daily volume for institutional clients.
- Built financial models in Python and Excel to evaluate M&A scenarios during investment banking internship at Bright Network.

Experience

Advertising Account Manager

May 2024 – Present

Here and Now 365, London

- Built Python scripts to automate campaign metric extraction from platform APIs, reducing manual reporting time from 4 hours to 45 minutes per campaign cycle.
- Delivered post-campaign analysis using statistical modelling to isolate channel-level ROI, directly informing budget reallocation that improved next-quarter campaign performance by 15%.
- Led client presentations translating complex data into strategic recommendations, growing account revenue through upselling by 20%.
- Coordinated cross-functional delivery across creative and media teams, managing timelines and dependencies for 8+ concurrent campaigns.

Operations Analyst, Prime Brokerage

Jan 2023 – Apr 2024

Morgan Stanley, Glasgow

- Managed pre-matching and settlement of fixed income and equity trades across US, EMEA, and APAC markets for hedge fund and institutional clients, processing \$10M+ in daily trade volume.
- Improved Straight-Through Processing (STP) rates by 10% by identifying recurring break patterns and building Excel/Python reconciliation tools to auto-flag mismatches before settlement deadlines.
- Resolved complex settlement failures involving tri-party repos and cross-border custody transfers, reducing average resolution time from 3 days to same-day for priority clients.
- Identified and escalated potential market and regulatory risks by monitoring post-trade exceptions in TM and SafeGUI, reducing incident occurrences by 15% quarter-over-quarter.
- Collaborated with account managers and compliance stakeholders to address margin call discrepancies and ensure adherence to CSDR and T+1 settlement requirements.

Investment Banking & Asset Management Internship

Jun 2021

Bright Network, London

- Conducted equity research and company valuations using DCF and comparable analysis, presenting investment recommendations to senior analysts.
- Built financial models in Excel and Python to evaluate M&A scenarios in the infrastructure and real assets space.
- Gained exposure to MIRA's global infrastructure portfolio and asset lifecycle management including

acquisition, diversification, and disposal strategies.

Account Assistant

Sep 2018 – Aug 2019

Bharath Shetty Tax Consultant, Mumbai

- Prepared and analysed financial statements for 30+ corporate and individual clients, using Tally ERP and Excel to identify discrepancies and recommend corrective actions.
- Managed end-to-end tax filing (corporate, individual, GST) collaborating with senior consultants to optimise strategies, achieving average client savings of 12–15% on effective tax burden.
- Automated recurring data entry tasks using Python scripts and Excel macros, reducing manual processing time by 25%.
