Dear Hiring Manager,

I am writing to apply for the Front Office Trading Support Analyst - Equities/Futures position at Robert Walters. With hands-on experience in prime brokerage settlement, trade lifecycle management, and risk operations at Morgan Stanley, combined with AI-assisted automation expertise, I am confident in my ability to contribute to your team from day one.

What I bring:

At Morgan Stanley's Prime Brokerage in Glasgow, I managed pre-matching and settlement of fixed income and equity trades across US, EMEA, and APAC markets for hedge fund and institutional clients. My key contributions included:

- Improving Straight-Through Processing (STP) rates by 10% by building Python and Excel reconciliation tools that auto-flagged mismatches before settlement deadlines.
- Executing daily risk controls and managing equity swap lifecycle events including corporate actions and expiries, performing trade matching via CTM across multiple time zones.
- Resolving complex settlement failures involving tri-party repos and cross-border custody transfers, reducing average resolution time from 3 days to same-day for priority clients.

In my current role, I have developed AI-assisted automation workflows using Claude and ChatGPT to rapidly prototype data pipelines, automate reporting, and build reconciliation tools — reducing manual processing time by 80%.

Why this role:

Robert Walters' reputation for connecting top talent with leading financial institutions aligns perfectly with my goal of bringing my trading support expertise to a dynamic front office environment where I can directly support equities and futures trading operations and contribute to operational excellence.

Technical skills:

I am proficient in Python (pandas, numpy, automation scripting), AI-assisted development (Claude, ChatGPT, Copilot), advanced Excel (VBA, Power Query, Pivot Tables), Bloomberg Terminal, CTM, and Refinitiv Eikon. I hold an MSc in Investment and Risk Finance (Distinction) from the University of Westminster, with coursework in financial modelling, portfolio management, and risk management.

I would welcome the opportunity to discuss how my experience aligns with your team's needs. I am available for a conversation at your convenience.

Kind regards,

Nidhi Shetty
